

Harshitha R

Computer Science Engineering Student

SUMMARY

Computer Science Engineering student with a growing interest in Python Full Stack Development. Currently building a strong foundation in Python, web development, and database concepts. Passionate about problem-solving and developing practical projects in machine learning to enhance technical skills. Eager to learn, contribute, and grow in a dynamic professional environment.

EDUCATION

BE in Computer Science Engineering,
C BYREGOWDA INSTITUTE OF TECHNOLOGY

- CGPA: 8.9
- Location: Kolar, Karnataka

Pre-University Board of Education,
SAHYADRI PU COLLEGE

- Percentage: 70%
- Location: Kolar, Karnataka

SSLC (Karnataka State Board),
SUVARNA CENTRAL SCHOOL

- Percentage: 90%
- Location: Kolar, Karnataka

SKILLS

HTML
CSS
JavaScript
SQL
Data Structures & Algorithms
Core Python including data types, control structures, functions, and file handling.

LANGUAGES

English
Kannada
Telugu
Hindi

PROJECTS

Prediction Pneumonia Disease Using Deep Learning, Machine Learning Project

- Developed a Convolutional Neural Network (CNN) model to classify chest X-ray images for pneumonia detection.
- Implemented image preprocessing and data augmentation techniques to improve model performance and reduce overfitting.
- Achieved 92% validation accuracy using TensorFlow and Keras.
- Utilized deep learning techniques to enhance medical image classification and support early disease diagnosis.

Applying Deep Learning For Breast Cancer Detection Using Radiology, Machine Learning Project

- Developed a deep learning model using CNN and ResNet-50 for detecting breast cancer from mammogram images.
- Applied feature extraction and model optimization techniques to improve classification performance.
- Performed hyperparameter tuning to enhance model efficiency and accuracy.
- Achieved 99% classification accuracy on the dataset.

Online Hotel Reservation System, Web Development Project

- Developed a web-based hotel reservation system to manage room bookings and customer details.
- Designed and implemented frontend using HTML, CSS, and JavaScript for an interactive user interface.
- Utilized SQL for efficient storage, retrieval, and management of booking and customer data.
- Implemented features such as room availability check, booking confirmation, and user data management.

CERTIFICATIONS

Hands-On GPT-3.5 & GPT-4 for Data Analysis & Machine Learning, Udemy

- Practical experience with GPT-3.5 and GPT-4 models for data analysis and machine learning.

Hands on with Google Cloud Platform

- Practical exposure to deploying and managing cloud-based applications.
- Journey to cloud.
